

# Book My Vaccine: Listing

The document provides guidance on Book My Vaccine (BMV) listing functionality.

All providers are onboarded with the ability to offer booking options through BMV. If your pharmacy already uses a different online booking system, please note that we are currently unable to merge external calendars with BMV. However, we can link your existing booking system to your BMV listing so consumers are redirected to the system you commonly use.

If you do not manage BMV directly, you may choose to be listed as an immunisation provider without appointment booking functionality. This “listing only” option is ideal for pharmacies that either use their own booking system or are unable to actively monitor bookings on BMV.

Being listed still allows us to promote your pharmacy, while directing consumers to your preferred booking platform.

To request the “listing only” option, please email [help@imms.min.health.nz](mailto:help@imms.min.health.nz) with **one** of the following:

- A link to your Healthpoint page
- A link to your alternative booking system
- A link to your pharmacy website

The link you provide must clearly display:

- Your location
- Contact information
- Services offered
- Opening hours

Once actioned, the online update will take effect within approximately one hour.

**Please note:** Any bookings made for your pharmacy on BMV prior to your pharmacy being updated to a listing will not be automatically cancelled. You will need to manually cancel or reschedule these bookings if you can no longer honour them.
